

GUIDELINE FINAL SUBMISSION HACKNUSA 2026

Securing Tomorrow: Innovating Trust, Delivering Impact

#FromIdeasToImpact

Final Submission Guidelines

As we approach the Face-to-Face Onsite Hackathon at Telkom University on October 3, 2026, your team is required to submit a comprehensive project portfolio. This portfolio will be evaluated by our committee to determine the Top 10 teams advancing to the Final Pitching session.

- **Submission Window:** You can start organizing and updating your files from September 12, 2026, until the final submission deadline on D-Day.
- **How to Submit:** Prepare and upload all required deliverables into an accessible Google Drive folder. You will submit the folder link via the official submission form **(to be announced on D-Day)**.

Required Deliverables

Your final submission must include the following three [3] deliverables:

1. Code Repository

Provide the complete source code of your developed solution.

Format: A Google Drive link containing your code folder, or a link to a public/accessible GitHub repository.

Requirements: The repository must include a clear **README.md** file with step-by-step instructions on how to run, install, or deploy the code locally.

Final Submission Guidelines (2)

2. Presentation Deck (Recommended: 10-15 Slides)

This slide deck will be used as your main presentation material if your team advances to the Final Pitching session (12 minutes total for pitching and Q&A). It should be concise, highly visual, and structured to clearly communicate your project's value proposition and technical depth.

Format: .pptx or .pdf.

Recommended Slide-by-Slide Structure:

- **Slide 1:** Title, Team Name, and Project Tagline.
- **Slide 2:** Problem Statement & Track Alignment (The core problem you are solving and how it fits the HackNusa 2026 track).
- **Slide 3:** Proposed Solution Overview (High-level introduction to your product).
- **Slide 4:** Unique Selling Proposition / USP (What makes your solution distinct and better than existing alternatives).
- **Slides 5-6:** Proof of Concept (PoC) & Core Features (Screenshots, system walkthroughs, or UI of successfully built working features).
- **Slide 7:** Technical Architecture & Tech Stack (High-level system design diagram and tools/frameworks used).
- **Slide 8:** Security Framework (Key security measures and data protection protocols implemented).
- **Slide 9:** Scalability & Deployment Roadmap (How your system handles scaling and future growth plans).
- **Slides 10-12:** Impact, Conclusion, and Q&A.

Final Submission Guidelines (3)

3. Project Report (Strictly 8-10 Pages)

A comprehensive technical written document allowing the evaluation committee to examine your project in depth.

Format: .pdf document.

Length: Strictly 8 to 10 pages maximum (excluding the cover page).

Required Chapter Structure:

- **Chapter 1:** Introduction & Background [Detailed context of the problem and its relevance to the hackathon track].
- **Chapter 2:** Solution Overview & Market Differentiation [In-depth architecture overview and competitive analysis highlighting your USP].
- **Chapter 3:** Proof of Concept (PoC) Implementation [Detailed breakdown of developed features and reference to your code repository].
- **Chapter 4:** Technical Architecture & Feasibility [Comprehensive system design, data flows, and technical justification].
- **Chapter 5:** Security Architecture & Intellectual Property Potential [Threat modeling, security measures, and IP/patentability analysis].
- **Chapter 6:** Scalability & Deployment Roadmap [Infrastructure requirements, performance analysis, and commercial deployment steps].

Final Submission Guidelines (3)

Important Notes for D-Day:

- **Submission Deadline:** All files must be uploaded and submitted right before the end of the working period. Late submissions may incur penalties or disqualification.
- **Access Permissions:** Double-check that your Google Drive link and GitHub repository are set to "Anyone with the link can view." If the committee cannot open your files, your team cannot be evaluated.
